64 About the Group

For a new Tomorrow

KR Industry creates a better future through changes.
We create a better tomorrow together by providing positive energy to customers and society through innovative ideas and sustainable business models, and creating social value together with customers and partners based on the philosophy of a **'responsible company'.**

ELIF Namwirye Station Edufore

Site	B3, Seongnam Bokjeong District 1, 79 Bokjeong-dong, Sujeong-gu, Seongnam-si, Gyeonggi-do
Overview	4 underground floors ~ 29 above-ground floors, 6 buildings and auxiliary facilities Land area 30,777㎡, total floor area 87,158㎡
Developer	BOKWANG Construction CO.,Ltd.

Housing business

Building Spaces in Harmony

Building a space alone cannot complete a house. Through its group brand ELIF, KR Industry plans new attempts with insight into the essence of housing and honest persistence in quality, and conveys careful consideration for leisure and rest.

ELIF provides true rest and leisure space to everyone.

Coupang Gimcheon FC Logistics Center

Site	1412, 1434 Danam-ri, Eomo-myeon, Gimcheon-si, Gyeongsangbuk-do
Overview	2 above-ground floors (ambient-only center)
Ordering Organization	Coupang Co., Ltd.

Logistics Center

Building the Backbone of Logistics

The logistics center construction industry is growing rapidly along with the expansion of the e-commerce market.

KR Industry is building the backbone of the logistics chain in Korea with distribution partners through expertise and a reliable quality management system based on accumulated experience.

Hanwha Space Center

Site	506, 1100-ro, Seogwipo-si, Jeju Special Self-Governing Province
Overview	1 underground floor ~ 2 above-ground floors, total floor area 11,443㎡
Ordering Organization	Hanwha Systems Co., Ltd.

Research Center (Space Center)

Beyond Earth, Building the Future

Responding to the challenge of space, KR Industry builds a new tomorrow.

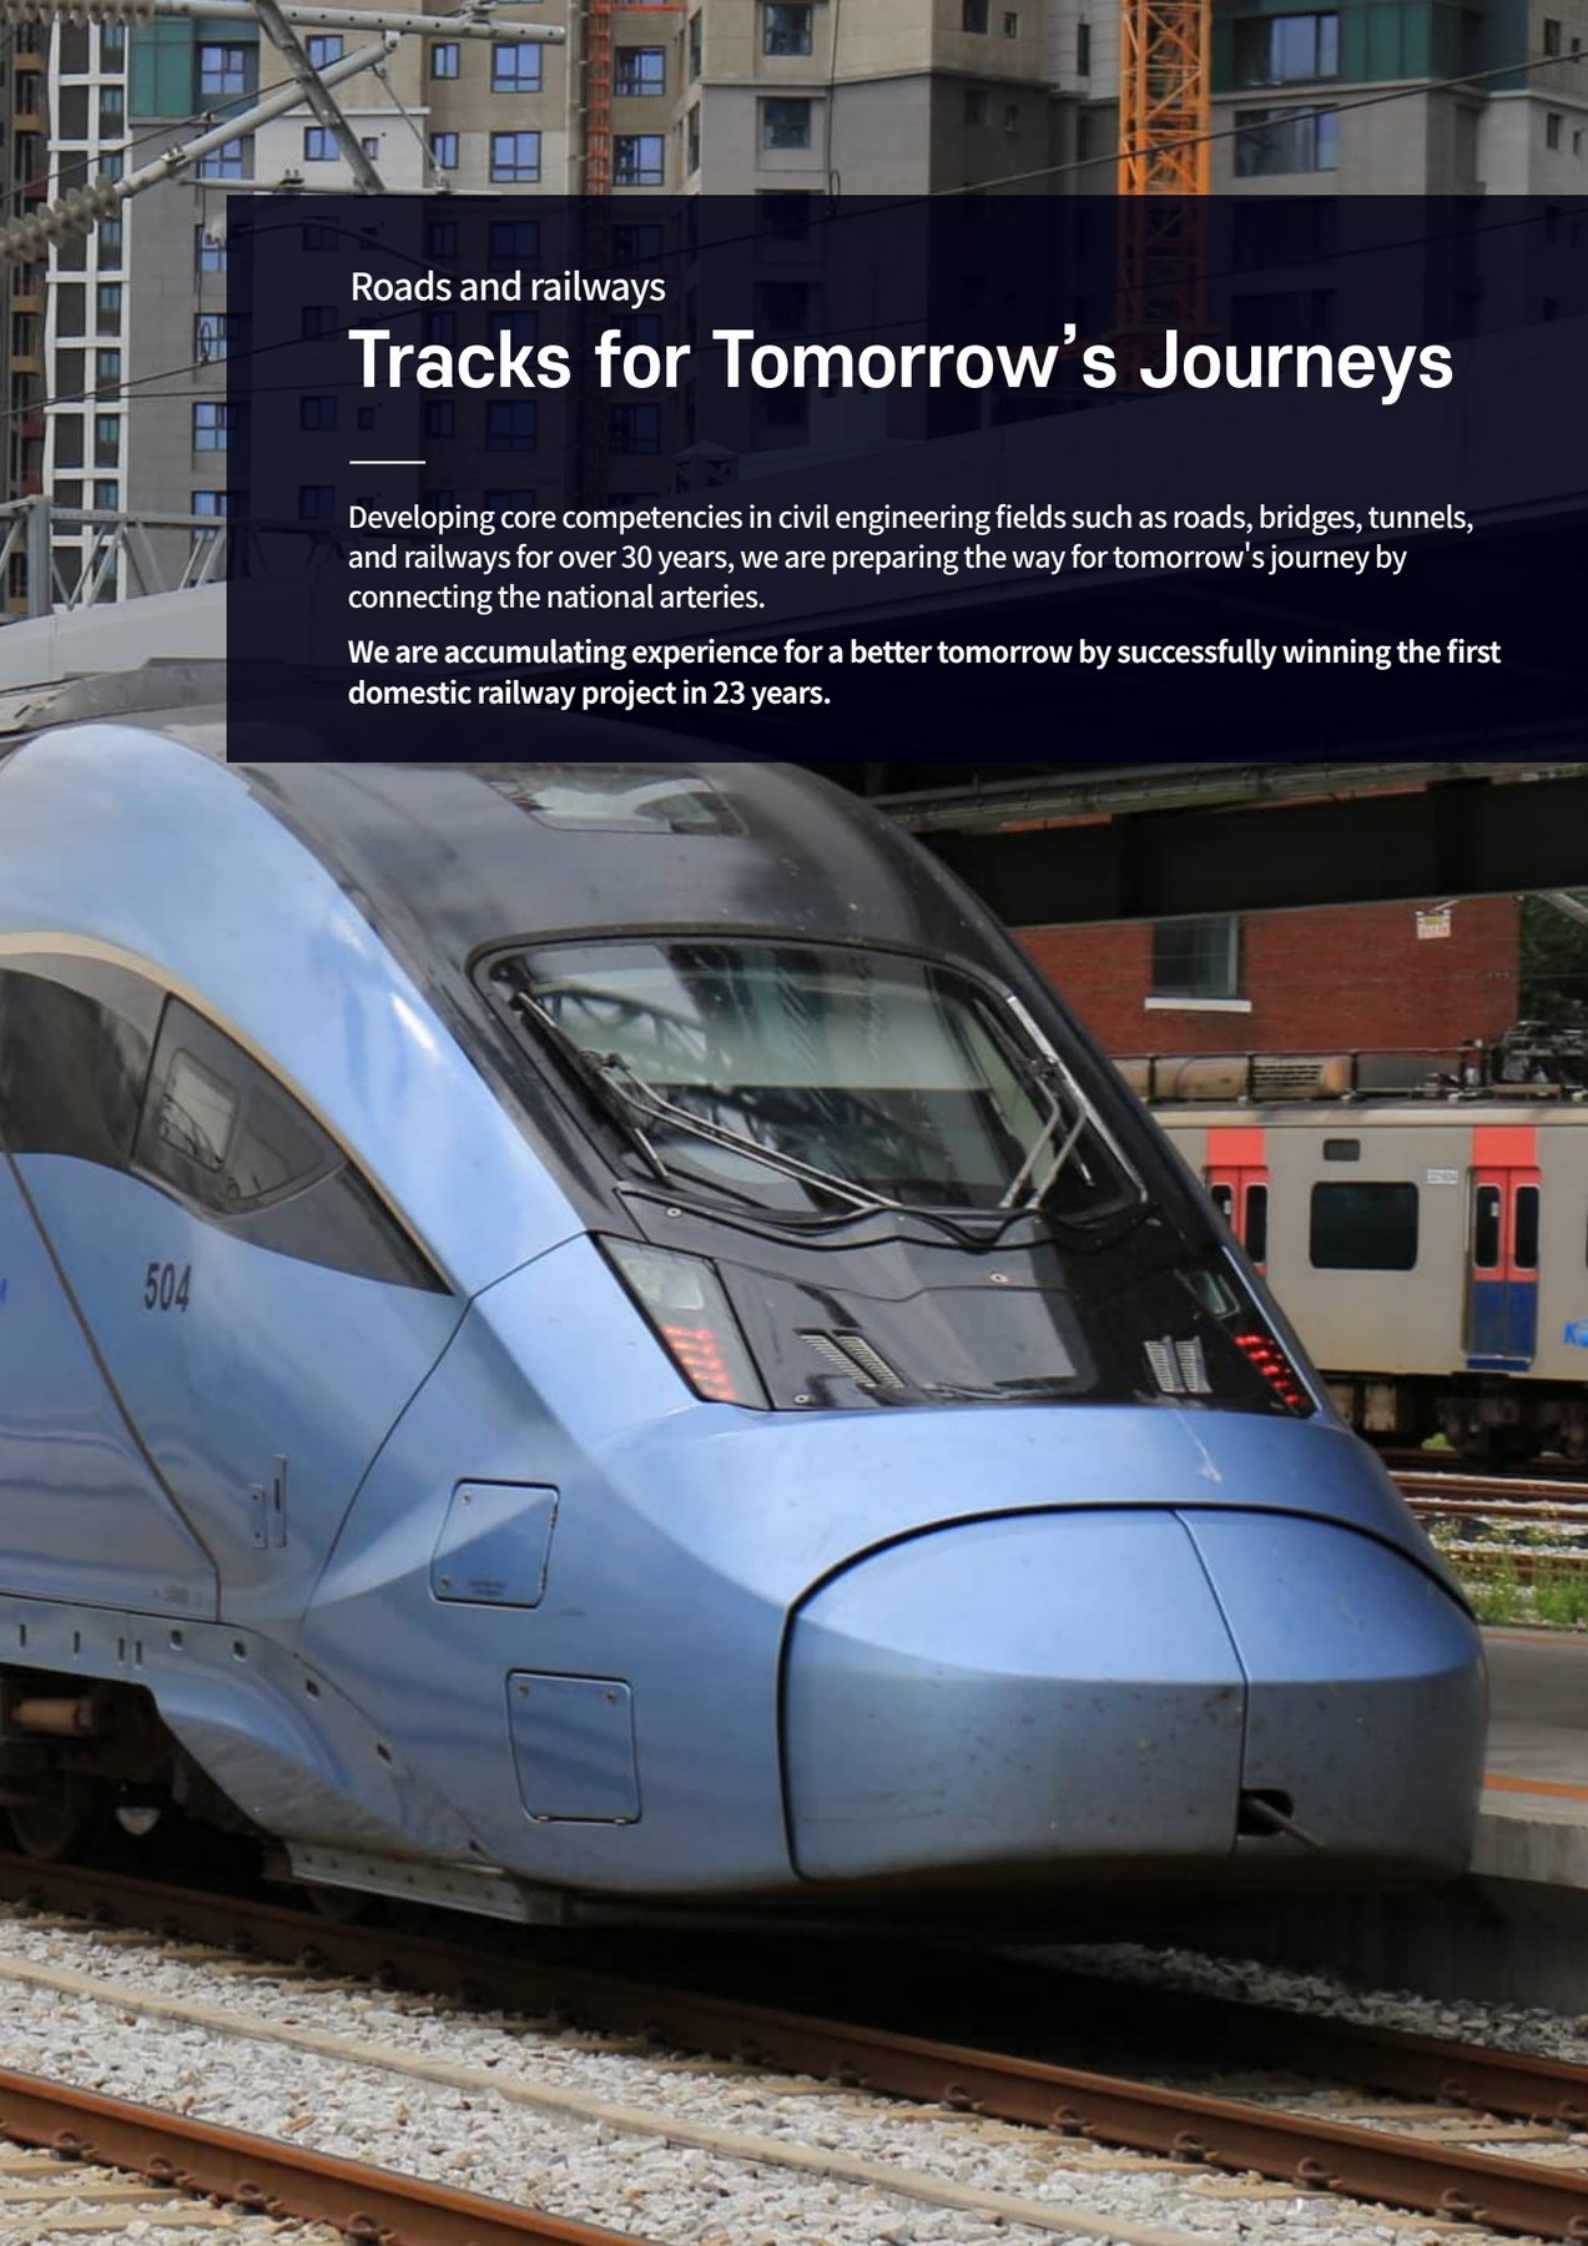

The space we create becomes the foundation for rewriting human space exploration, and we lay the foundation for a new leap forward to ensure that future generations can dream of and realize a wider universe.

Wolgot~Pangyo Double-track Electric Railway Section 5

Site	Seoksu-dong, Anyang-si, Gyeonggi-do ~ Anyang-dong, Anyang-si
Overview	Length L=1km856.22
	Tunnel L=1km756.22
	1 station, 1 main line ventilation system
Ordering Organization	National Railroad Corporation

Roads and railways

Tracks for Tomorrow’s Journeys

Developing core competencies in civil engineering fields such as roads, bridges, tunnels, and railways for over 30 years, we are preparing the way for tomorrow's journey by connecting the national arteries.

We are accumulating experience for a better tomorrow by successfully winning the first domestic railway project in 23 years.

Sangju~Yeongcheon Expressway Private Investment Project Integrated Maintenance Service

Site	Hwasan-myeon, Yeongcheon-si, Gyeongsangbuk-do
Overview	Length 93.9km 11 ICs and JCTs, 6 tunnels, 112 bridges, 10 sales offices, etc.
Ordering Organization	DL E&C Co., Ltd.

Maintenance

Ace of Total Maintenance

The Sangju-Yeongcheon Expressway, the second Gyeongbu Expressway connecting cities on the Yeongnam East Coast, including Seoul, Busan, Ulsan, Pohang, and Gyeongju, with the shortest distance, has introduced an Intelligent Transportation System (ITS) to present a fast and safe next-generation transportation system using a traffic management system (FTMS/TTMS) and a toll collection system (TCS, ETCS, multi-lane system).

Gosam Lake Complex Service Area

Site	Sejong-Pocheon Expressway Sejong starting point 70km
Service Area type	1 underground floor to 3 above-ground floors, one-sided concentrated type, IC integrated type
Main facilities	Restaurant, convenience store, dining garden, business zone, wellness lounge, observation deck (cafe)

Distribution business

Capturing Nature Through a Prism

Located in the middle of the Sejong-Pocheon Expressway with cutting-edge ICT technology, the Gosam Lake Complex Service Area is a model of 3rd generation rest area in preparation for the autonomous driving era that is just around the corner.

The Prism design method that maximizes efficient moving lines is combined with the Sunset Garden overlooking Gosam Lake, presenting visitors with the most beautiful Service Area that captures the nature of Anseong.

CEO's Message

“ Building a Better Tomorrow through Principled Management, Continuous Challenge, and Unwavering Responsibility

We sincerely thank our customers for their continued support and trust in KR Industry of the Kyeryong Group.

KR Industry was established as the Korea Highway Management Corp. in 1987 as a public enterprise. After its privatization in 2002, it was incorporated into the Kyeryong Group. Since then, the company has developed into a specialized firm in highway construction, maintenance, and service area operations, and has further evolved into a full-fledged general construction company.

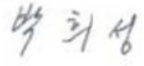

Breaking away from a business structure limited to civil engineering, our company has diversified and established business areas including construction and development, growing into a true general construction company. We are also preparing to make a leap forward as a first-class domestic construction company and a global general construction company on the world stage.

We launched the premium apartment brand 'ELIF' and presented a new lifestyle in the residential architecture sector. **Based on our solid logistics center construction track record, we are currently carrying out logistics projects with Korea's largest distribution companies, including Coupang and Lotte.**

Safety and quality are always the highest values that cannot be compromised in the construction industry. With the goal of achieving the highest quality, zero accidents, and zero incidents, KR Industry has maintained a record of ZERO major accidents for 7 consecutive years and has proven its expertise by winning the '2023 Safety Management Award.'

KR Industry is not only a friendly company that receives love and trust from customers and gives them joy, but also a company that fulfills its social responsibility through respect for people and transparent management. We ask for your support and encouragement for KR Industry's challenge to elevate construction to a companion in life.
Thank you.

CEO of KR Industry Park Hee-sung

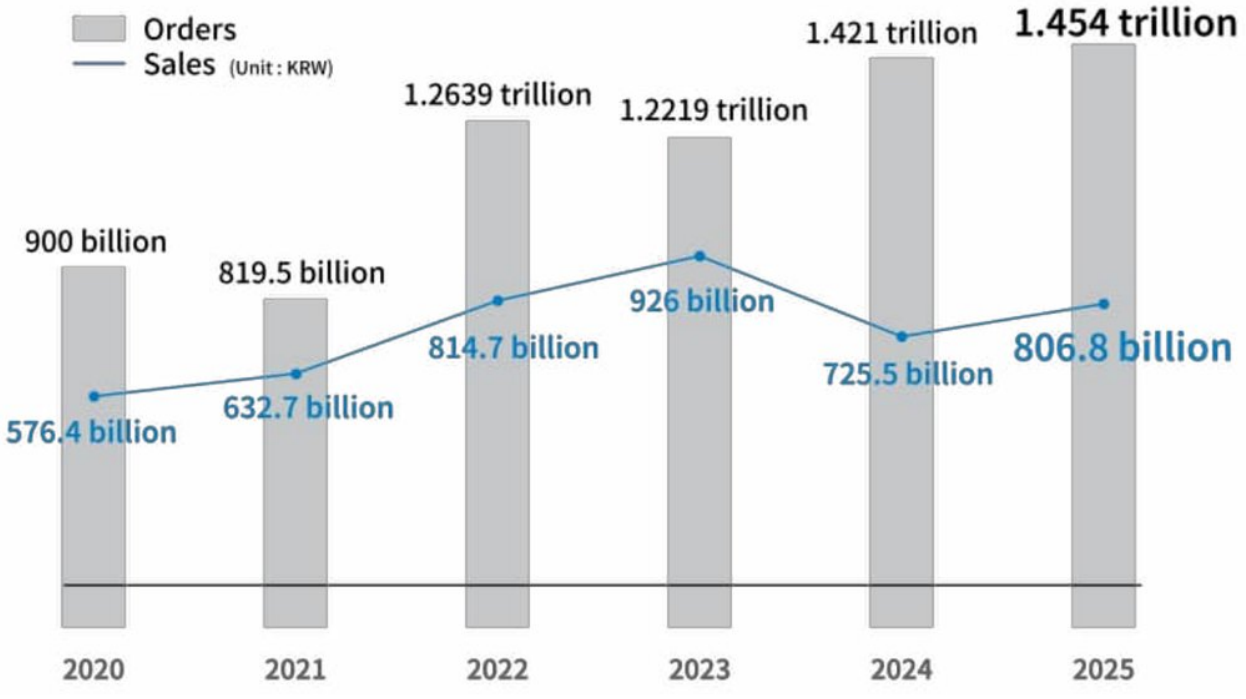

About KR

KR Industry, which has dispelled the negative image of the construction industry, is strengthening its fundamentals through ABCD management.

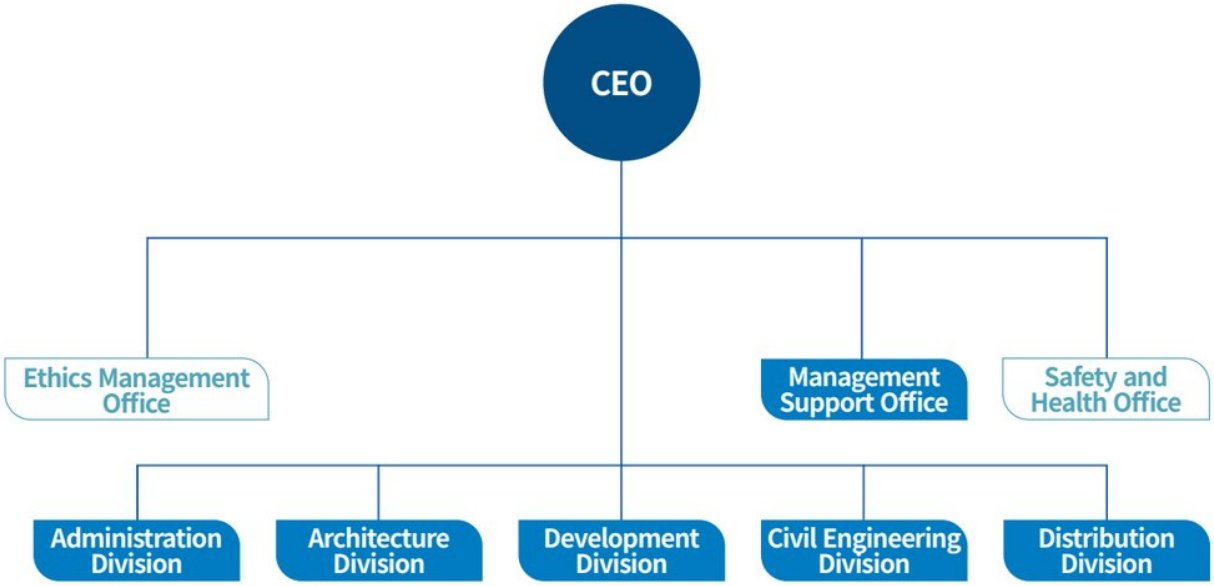

To this end, it has established a risk diversification portfolio and reorganized the organization for risk management. As a result, it has achieved orders of 1 trillion won and an increase in sales approaching that amount.

Creation
Responsibility

Management policy

Substantial management
On-site management
Quality and safety management

Mission

Realizing a centennial enterprise KR through sustainable management

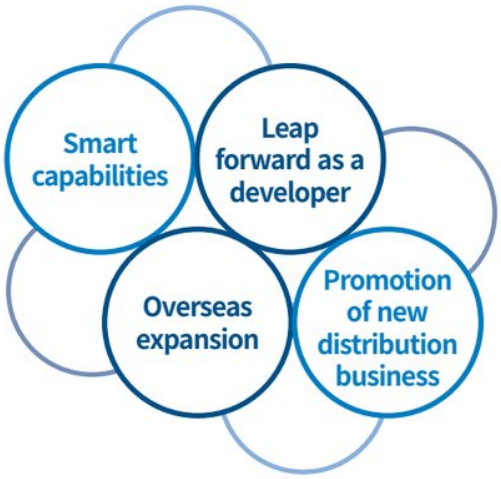

Long-term Goal

Leap forward as a "comprehensive service company" that pursues sustainable value

Mid-term Goal

Discovery of new growth engines and top quality, safety management

Strategic Directions

Strategic Tasks

1. Promoting smart safety equipment, advanced management system, strengthen design capabilities utilizing BIM
2. Strengthening competitiveness of logistics centers, pursuing customer satisfaction for residential/non-residential products, entering new businesses such as PropTech
3. Starting new overseas O&M, reviewing overseas expansion in distribution and development sectors
4. Planning and winning new private facility orders, expanding supply of new demand products such as meal kits and alternative meat

Traces of KR Industry Creating

A Better Tomorrow than Today

1987 ~ 1998

Established Saegil Co., Ltd., Changed name to Korea Highway Management Corp. Established the framework of the company

Jan. 1987	Established Saegil Co., Ltd.
Aug. 1991	Changed name to Expressway Maintenance Corp.
Nov. 1995	Changed name to Korea Highway Management Corp.
Dec. 1995	Registered as facility maintenance business
Oct. 1996	Registered as landscaping business
Aug. 1997	Obtained civil engineering and construction business license
Jun. 1998	Obtained quality management system ISO9001
Jun. 1998	Obtained electrical engineering business license

Apr. 1999	Reported overseas construction business (civil engineering and construction work, facility maintenance management)
Jul. 1999	Received Commemorative Best Group Award on the 8th Road Day
Aug. 1999	Established a Chinese joint venture (Shenyang Far East Road Construction Co., Ltd.)
Mar. 2000	Received the 8th Korea Marketing Frontier Award in the public service sector
Jul. 2000	Received Presidential Citation on the 9th Road Day
Apr. 2001	Selected as an excellent company with a new labor-management culture in the first half of 2001
Apr. 2001	Registered as a specialist in electrical safety management
May 2001	Registered as a specialized agency for safety diagnosis in the bridge and tunnel sector
Jun. 2001	Obtained ISO14001 Environmental Management System

Standing at the top as a road maintenance company

1999 ~ 2001

Incheon International Airport O&M

Baehuryeong Tunnel O&M

Dec. 2002 Privatization (incorporated into Kyeryong Group)
Apr. 2003 Registered as a housing construction and land development business operator
May 2003 Registered as an information and communication construction business
Jun. 2003 Registered as a specialized firefighting facility construction business
Mar. 2006 Reported as an engineering activity entity
Apr. 2006 Designated as an excellent construction business operator by Korea Expressway Corporation in 2005
Aug. 2006 Registered as an industrial environment facility construction business
Nov. 2006 Registered as a real estate rental business

2002 ~ 2022

Incorporated into privatized "Kyeryong Group", diversified portfolio, and grew into a general construction company

Feb. 2008 Selected as an excellent construction company in the architectural facility sector of Korea Housing Corporation
Mar. 2008 Registered in landscaping and planting business
May 2008 Registered as real estate development business
Jul. 2009 Received Presidential Industrial Medal in commemoration of the 18th Road Day
Jul. 2009 Changed company name to KR Industry Co., Ltd.
Aug. 2011 Registered as water quality control facility business

Research Development (R&D)

Light Washer

Patent No. 0893316
Tunnel Light Washer

Fire Prevention

Patent No. 2453362
A road tunnel fire extinguishing device recycling rainwater

Patent No. 2438651
A device for blocking vehicle entry in case of a road tunnel fire

Patent No. 2465170
A device for identifying a road tunnel fire extinguishing device using RF communication

Patent No. 2426454
A side ditch for fire prevention due to oil spillage in a road tunnel

Patent No. 2426442
A line-of-sight guidance device for road tunnels that can respond to a fire emergency

Patent No. 2436527
A waterproof transmitter and indicator assembly for road tunnels

Patent No. 2438654
A shielding device for suppressing fire in road tunnels using an air tube

Common duct

Patent No. 1681478
Folding arrangement of transmission and distribution cable power duct of common duct

Patent No. 1716277
A folding sliding cover of tunnel common duct for easy maintenance

Patent No. 1718140
Ventilation facilities for safety maintenance of underground common duct

Patent No. 1727718
A folding railing for easy common duct construction and maintenance

Lighting device

Patent No. 1593500
A diagnosis device for departure and illuminance change of tunnel lighting

Patent No. 1593503
A tunnel lighting system that can automatically adjust brightness through gaps

Patent No. 1610328
An electricity generation and lighting installation stand using wind power generated within a road tunnel

Patent No. 1678879
Tunnel lighting with easy angle adjustment and module replacement

Patent No. 1744929
System for detecting abnormalities in tunnel luminance

ITS and road maintenance

Patent No. 2176669
Anti-icing paint composition for improving driving safety on icy roads

Patent No. 2647196
A self-inspection and remote reset device for telephone exchange facilities

Patent No. 2660283
A cover that can improve CCTV camera recording quality

Patent No. 2677159
A communication equipment grounding rod for constant inspection

Patent No. 2696706
IOT-based optical transmission equipment transmission network line monitoring device

Patent No. 2738450
A communication equipment monitoring device

Patent No. 2742325
An optical cable connection box fixing device with smoke detection function

Patent No. 2768879
A communication manhole gas detection device capable of remote and manual detection

Pile head reinforcement device

Patent No. 0743729
A steel pile head reinforcement device

Patent No. 0960610
Head reinforcement structure of steel pile with distributed force

Patent No. 1163363
Steel pile head reinforcement structure with multiple vertical reinforcements

New Construction Technology No. 730
A steel pile head reinforcement method using belt-shaped perforated steel plate connector with shear projection (Crown Cap method)

Paving method

Patent No. 0823986
Manufacturing method of low-elastic polymer concrete admixture for suppressing alkaline aggregate reaction

Patent No. 1045877
Waterproofing and surface reinforcing agent for asphalt pavement surface and manufacturing method thereof and maintenance and reinforcement method for asphalt pavement surface using waterproofing and surface reinforcing agent

New Construction Technology No. 943
Asphalt road paving method using the characteristics of steelmaking slag aggregate

Shrinkage reduction technology for concrete

Patent No. 1544771
Shrinkage reduction composition for concrete containing carboxyl-based eco-friendly composite compound and fluorosilicate-silica-alumina composite and method for manufacturing the same

Patent No. 1685001
Manufacturing method for surface penetrating coating protection material for concrete structure and surface penetrating coating protection agent for concrete structure manufactured thereby

Patent No. 1901198
Manufacturing method for surface penetrating surface protection material for concrete structure

Patent No. 2248986
Concrete cyclization agent containing carboxyl-based composite compound and silica hybrid fluorosilicate complex compound

Green Technology No. 21-01228
Technology for improving watertightness and durability of concrete structure using carboxyl-based and silica hybrid fluorosilicate complex compound

Disaster Prevention Technology

Patent No. 1952596
Heavy equipment system for rescue of buried people equipped with active RF ID tag

Talent Training

KR Industry's ideal talent is a Future Type who has secured core competencies and has excellent abilities with creativity, change, and a challenging spirit. Believing that talent is the source of corporate value, KR Industry is developing talent based on respect and trust for individuals.

ELIF

ELIF, 'Renewing everyday life', is a modified spelling of LIFE, expressing the residential space of Kyeryong Group that sees life differently and creates everyday life anew.

Insight into the essence of housing

Insight

ELIF creates a space that contains all the values of life.

ELIF provides a beautiful space to express the individuality and taste of customers. We create a unique value that considers the present and future of the family through a residential environment that combines vision, nature, and education.

Honest persistence in quality

Honesty

We create brand trust based on practicality and stability.

Knowing the most important value, we insist on meticulous and detailed quality. Minimizing complaints through close cooperation with the local community, we create the highest quality brand based on the sense of responsibility of employees.

A new attempt at difference

Difference

We create a common living area where everyone can live together.

Focusing on the core of housing, we pursue a new daily life through a different premium space.
Through reflection on the space needed in modern society, we design a space that takes into account even family members to be born in the future.

Careful consideration for leisure and rest

Refresh

We create spaces that enhance vitality in life

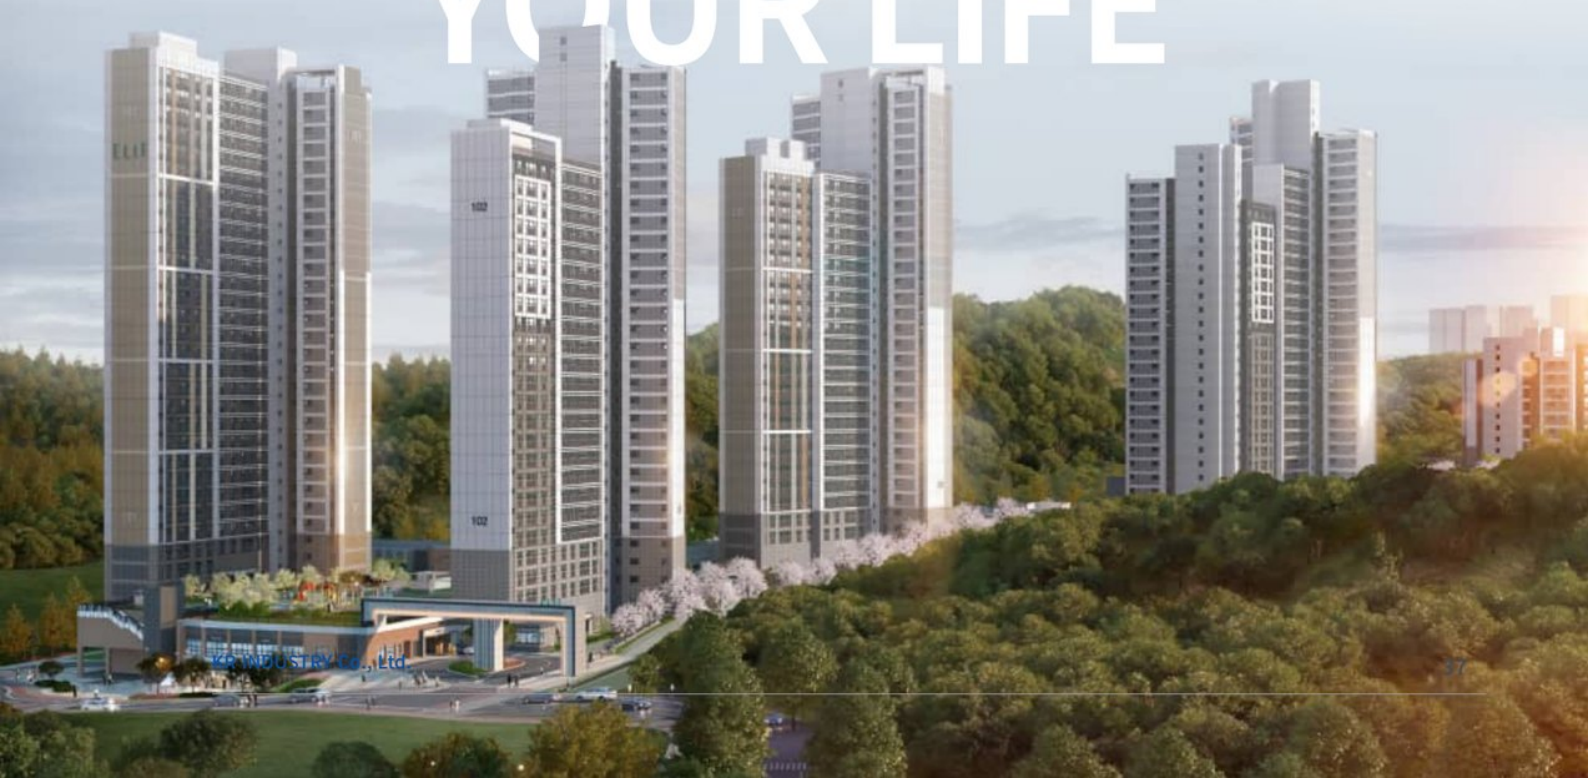

With the mindset of building a house that brings vitality to everyone's daily life, we are constantly thinking in each field such as site selection, product development, design, construction, and after-sales service. The interior space, designed with the life moving line in mind, provides comfortable rest.

ELIF

Building a space alone doesn't make it complete.

Only the daily life created together in that space completes a house that embodies new life.

ENHANCE YOUR LIFE

ESG Management

A truly progressive company is completed when it fulfills its responsibilities as a member of society, not just staying as the company

KR Industry, which fulfills its corporate social responsibility of returning corporate profits to society, is striving to create a healthy society where both society and companies prosper together.

Environment (E)

Environmental Management Guidelines

In order to fulfill its global environmental responsibility, KR Industry has established its own environmental guidelines to take the lead in responding to climate change.

Environmental Management System ISO14001 Certification

KR Industry, which introduced an environmental management system that meets international standards, has established a system to manage environmental issues in all processes.

On-site Environmental Cleanup Activities

KR Industry is reducing emissions and practicing active environmental protection activities through eco-friendly raw materials and officially designated waste management companies.

Water treatment facility business

KR Industry has been designing and constructing efficient water treatment facilities to prevent pollution of rivers and seas, and are carrying out various projects to protect clean water.

Reflection of Environmental Friendliness throughout the Process

KR Industry is striving for energy efficiency, ecosystem protection, and greenhouse gas reduction from planning to disposal, and is promoting sustainable environmental campaigns.

환경경영시스템 인증서

ISO14001 (Environmental Management System)

Society (S)

Quality Management System ISO9001 Certification

We are providing the best quality by complying with international standards in the contract and execution process.

Defect Management Team

We respond quickly to defects occurring at construction sites and minimize quality problems through prevention.

Occupational Health and Safety Management System ISO45001 Certification

We introduced a safety management system that prevents industrial accidents through the participation of all employees, and are creating an optimal work environment.

2023 Safety Management Award

We actively introduce smart safety equipment and systems to provide a safe working environment. We have also been recognized for the highest level of performance in safety management in the construction industry.

Expansion of Various Opportunities

KR Industry is expanding employment opportunities for the vulnerable class of employment and realizing social value by increasing the employment rate of the disabled every year.

Contribution to Local Communities

As a company that grows together with the local community, we are fulfilling our local welfare and social responsibility, and our CEO and employees are taking the lead in contributing to creation of social value.

ISO9001
(Quality Management System)

ISO45001
(Occupational Safety and Health Management System)

Governance (G)

Board of Directors

We practice transparent management through systematic board regulations for efficient management. We perform regular reporting and decision-making on major management activities.

Constant Risk Management System

We quickly analyze business risks and prepare response measures to minimize financial/non-financial risks

Practice of Ethical Management Standards

We build an ethical management culture to strengthen transparency and morality, and strictly adhere to ethical standards under the leadership of the CEO.

Audit System

We are increasing management transparency and pursuing continuous improvement through regular internal audits and accounting inspections.

KR Industry Labor Union

We are maintaining cooperative relationships with workers and creating a fair labor environment. Through win-win labor-management relations, we are promoting worker welfare, and were selected as an excellent labor-management culture company in recognition of these achievements.
